README.md

## 🔗 Full automation of a two-room apartment 🏠 using Home Assistant, MegaD-2561, Sonoff and Electrodragon

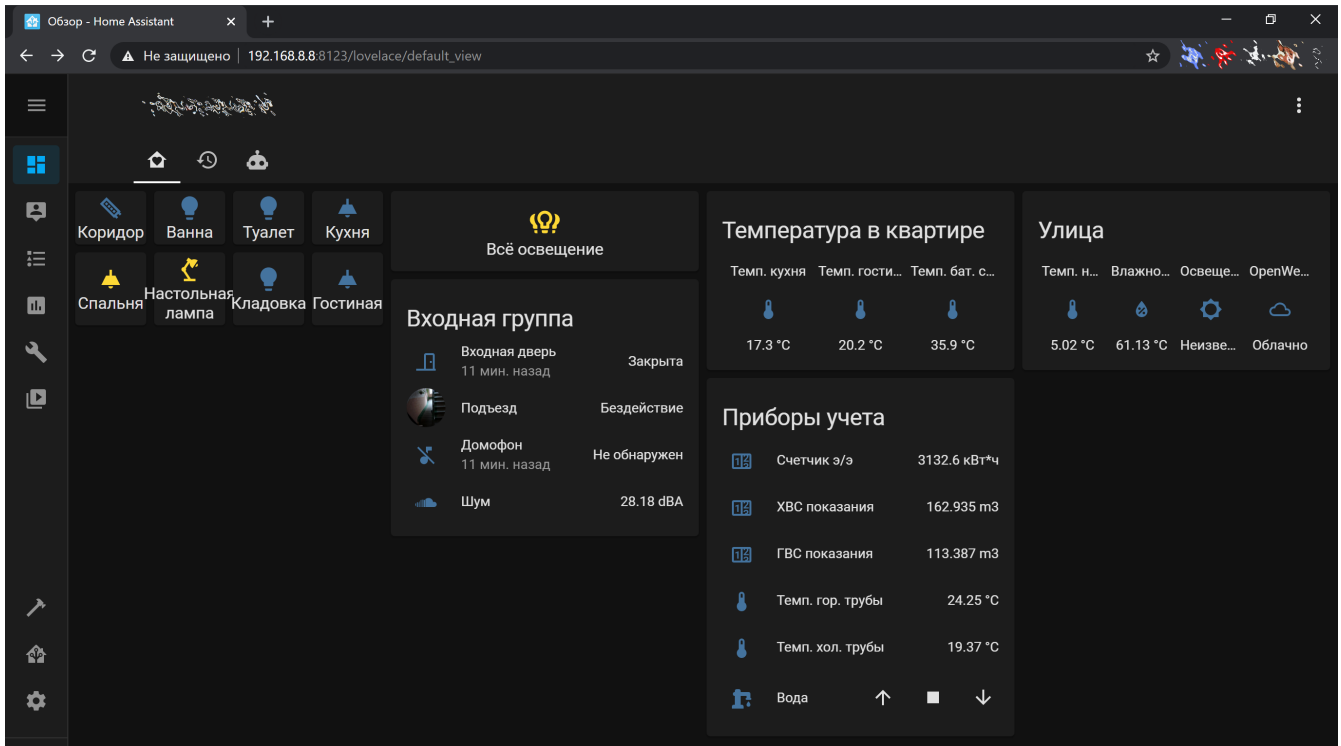

The repository presents the complete configuration of [Home Assistant](#) for all devices in the apartment.

Read this in other languages: [English](#), [Русский язык](#).

Automation was done using the [Wifi IoT Relay Board Based on ESP8266](#) relay and the [Sonoff Basic WiFi Wireless Switch](#) with [Tasmota firmware](#). Relays are installed in oversized junction boxes in the walls of the apartment. To receive data from sensors and partially to control the relay, a multifunctional MegaD-2561 controller is used.

Additional information in the articles (in Russian): [first](#), [second](#) and [third](#).

## Current view of the Home Assistant interface:

🔔 Plan to migrate firmware [ESPHome](#).
